

TEXAS ROTORCRAFT ASSN.

PRESIDENT'S CORNER

23 September 2006

Meeting place, Herb and Sally's in Olney

Saturday, 28 October, is our next meeting.

September, 23, 2006. Club meeting at noon Saturday. We held our meeting in Herb and Sally's restaurant in Olney, Texas.

The main order of business for this meeting was election of officers. Officers elected are;
Bob Stark, President
Gene Hull, Vice President
Bob O'Dell, treasurer
Brian Fair, Web Master.

We agreed to elect a secretary during our next meeting. Be there or you may be it.

We discussed planning for the ASC Nationals to be held in Olney, 1st and 2nd of Sept. 2007. We have a year or so to plan. Bob Stark requested that the club take on the task of planning the judging for the Nationals. We would include experts from ASC in other classes of aircraft upon their arrival in Olney. Also needed are helpers to man an information station to be located on the entrance road. They will pass out instructions and get names and counts of persons entering.

Texas Rotorcraft Assn. Is now affiliated with ASC and PRA. I am asking all of our members to join ASC. I think this will help with our part in the Nationals next year.

I know that since we moved the meeting to Olney, the drive has been made much longer. With the help of all of our members, we can make it worth while. Every One please try to attend the meetings. Now that we have a goal to meet, we need everyone.

DUES ARE DUE. Send your renewal to:

Bob O'Dell, Treasurer, Rt 3, Box 159, Olney, Texas 76374. \$25.00 for renewal or \$30 for new members.

The back of this news letter is an application form for ASC.

During the last year I have been sending Homebuilt Rotorcraft Magazine to all paid members of TRA. I must now discontinue this and request that those who want to continue receiving it send in their subscriptions. Send to: Homebuilt Rotorcraft Magazine, Box 428, Olney, Texas 76374. One year sub. Is \$25.00.

A new Golden Butterfly in under construction in my hangar here in Olney. This one will be certificated as Light Sport, Experimental. This will allow training for the Light Sport Pilot's license.

By the way, I expect everyone to stand at attention and play music when I walk into the room. Well, that is what they do for President Bush!
